SUMMARY

Frontend Developer and B.Tech Computer Science (Artificial Intelligence) student with hands-on experience building responsive and user-friendly web applications using HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap, and Redux Toolkit. Experienced in developing component-based interfaces, responsive layouts, application state management, and modern web projects. Strong interest in building scalable, interactive, and performance-focused web applications. Seeking a Frontend Developer internship or entry-level opportunity to contribute technical skills while growing in a professional development environment.

EDUCATION

G H Raisoni Institute of Engineering and Business Management, Jalgaon
Bachelor of Technology (B.Tech) – Computer Science and Engineering (Artificial Intelligence), CGPA: 8.24 *2023 – 2027*

Gurukul Dnyanpeeth, Telhara
Higher Secondary Certificate (HSC), Percentage: 72%

Gurukul Dnyanpeeth, Telhara
Secondary School Certificate (SSC), Percentage: 83%

EXPERIENCE

Frontend Development Internship

- Completed a frontend development internship involving practical work with modern web development technologies.
- Applied React.js, JavaScript, HTML, CSS, and responsive design concepts to build and improve web interfaces.
- Gained practical experience with Git/GitHub and frontend project development.
- Worked on real-world web application development and improved understanding of component-based frontend architecture.

PROJECTS

01Slab – Translator and Utility Web Application | Technologies: React.js, JavaScript, Tailwind CSS, React Router, Vite

- Developed a responsive React-based web application with multiple pages and reusable UI components.
- Implemented client-side navigation using React Router for Home, Translator, Generator, About, and Not Found pages.
- Integrated a translation service API to provide multilingual translation functionality.
- Implemented dark and light theme functionality using React state and Tailwind CSS.
- Designed responsive layouts for desktop and mobile screen sizes.
- Used reusable React components to improve code organization and maintainability.
- Deployed the project and maintained the source code using Git and GitHub.

Music Player Web Application | Technologies: React.js, JavaScript, Tailwind CSS

- Developed a modern music player interface with responsive layouts and interactive UI components.
- Implemented song search functionality and dynamic rendering of music-related content.
- Used React state management to handle search input, selected songs, and player interactions.
- Designed responsive song cards and interface components using Tailwind CSS.

- Focused on creating a clean, user-friendly interface suitable for modern web applications.

Frontend Landing Page | Technologies: HTML5, CSS3, JavaScript
- Built a responsive landing page using semantic HTML, CSS layouts, and JavaScript.
- Created a modern hero section with responsive grid-based layouts.
- Designed reusable content sections and statistics cards for presenting information clearly.
- Implemented responsive design principles for different screen sizes.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, Tailwind CSS

State Management: Redux Toolkit, React-Redux

Development Tools: Git, GitHub, Vite, VS Code

Core Concepts: Responsive Web Design, Component-Based Architecture, React Hooks, React Router, State Management, DOM Manipulation, Event Handling

LANGUAGES

English, Hindi, Marathi

CAREER INTERESTS

Frontend Development, React.js Development, Next.js Development, Web Application Development, UI Development
